

Horse Bracelet in 9ct Gold dated Birmingham 1977, Lilly's Attic since 2001

£1,650.00

Q: What was the first horse in history?

A: The modern day species of Equus (horses, zebras, and asses) have been around for about 2 million years. They are very different from the earliest known horse, Hyracotherium, otherwise known as Oehippus, or "Dawn Horse". This ancient horse was a small, dog-sized creature that lived from 55 to 45 million years ago.
