

Omega Oversize Vintage Jumbo
£2,250.00

Watch: Omega Oversized Automatic Dress Watch
Stock Number: CHW4927
Price: £2250.00

Now this really is quite an unusual piece, from the 1950's believe it or not this beautiful looking Omega Dress Watch has a 38mm size case! Almost unheard of for the era with many that have survived generally measuring around 34mm.

38mm was certainly not the norm or fashionable back then but most certainly is a desired size today. 18ct Rose Gold case that remains in beautiful condition with sharp lugs.

Automatic movement the watch appears to have its original dial in place that has a wonderful concentric style to it around the outside with alternate baton and number hour markers in gold that match the hands. What makes this even more rare is the fact it has the subsidiary seconds dial above the 6. Beautiful speckled patina to the dial.

500 base calibre jumbo Automatic

Omega Crown and buckle, generic brown leather strap. Engraving to the rear of the case 'Margarita 1957' could be removed but we have chosen to leave as original as possible.

Exceptional condition for a watch of this era that has beautifully aged, in fine working order.
