A real treasure and wonderful find, This Omega Seamaster 300 has been worn daily by its last 2 family owners up until the last few years at which point it was locked away in a drawer.

We have purposely done very little work to this watch but what we have done we will point out.

It has an original black dial with original hands. Bezel may be slightly later from a service. Well worn in places with the case as you would expect showing lovingly worn marks and scratches. It appears to have never been polished with the plexiglass appearing original too.

The dial has aged and naturally discoloured to give a real genuine vintage feel and look to this Seamaster. It looks to be a really honest example of what it is which is an early 60's Seamaster 300!

Our watchmaker has been through to the watch to ensure it is working as well as it can be mechanically and is now reading +/- 9 seconds per day.

We have made one or two changes out of necessity, the strap fitted to this watch is a new authentic, black with grey lines, Omega Nato Style strap with an Omega signed buckle.

The crown too is Omega NOS that replaced the badly damaged previous one. A very light clean, and we mean light and that is as far as we have gone.

An opportunity to own a really honest Seamster 300 that shows its beautiful battle scars but operationally is more than capable.
