

## **Lemania Cal.3000 Compressor** **£775.00**

A wonderful example of an iconic early Civilian Lemania thought to be from the mid 1950's and in exceptional original condition for a watch of that age.

35mm case diameter that is 7mm that does not include the domed armed plexiglass. 18mm lug width with clear signs of age as would be expected.

Lemania 3000 calibre movement that is absolutely stunning and shouldn't be confused for lesser Calibers.
