

HAMILTON Royal Airforce 6B-9101000
£1,800.00

The Hamilton Mk11 were used by the Royal Airforce between 1961 right through to 1970 and this one appears a decent honest version of it from somewhere in the mid 60's with only around 3000 thought to have been made.

Beautifully naturally discoloured hour markers that match the hands. Black dial with bold number hour markings in front of the track around the dial.

36mm case size excluding the crown which appears to be original, 18mm lug width. The Acrylic crystal appears to also be original with very little signs of wear and tear or any markings.

All the corner and edges of the case are sharp with very little wear to the movement which winds easily and freely.

17 Jewel Cal 75 manual wind movement complete with original soft iron antimagnetic internal case.

Original lume on the dial is all present and correct although no longer functions in the dark as would be expected.

Antique ref: CHW5542
