The ring features a sculpted figure, representing a mythological or classical theme. The sculpted figure on the ring is rendered in gold, with a matte finish that contrasts with the polished gold and the sparkle of the diamonds set within the design.

The style elements of this ring are rooted in classical and Art Nouveau influences, characterized by flowing lines, organic forms, and an emphasis on natural beauty. The sculpted figure is reminiscent of the Art Nouveau movement, which often featured sensuous, natural forms and intricate designs.
