

**Omega Constellation 14393**  
**£1,495.00**

Originality and completeness are what makes this Omega Constellation 14393. Although the dial has marks, it is clearly an original Cross Hair Pie Pan dial with gold coloured hour markers and hands. In addition, it is fitted to what we believe to be its original steel bracelet.

Dated to 1958 by the serial number this is an all steel watch with a 34mm case. Plexiglass. Date window at '3'.

Powering this Constellation is the 561 caliber automatic movement giving a power reserve of around 40 hours.

Steel Omega signed bracelet with folding clasp to fit a wrist to 7.75 inches.

The dial could be cleaned up upon request, but we have chosen to leave as is.

Our View - Yes the dial has some markings showing it's been worn and loved however to find a version of this watch attach to the bracelet and with that two-tone dial configuration would be a tough ask. A great honest example of an automatic late 50's Omega.
