A hard watch to track down and find but one that comes from a brand with long history of Swiss watchmaking dating back to 1875. This Marc Nicolet Skin Diver 34-313 is a great example of the 60's .

37/38mm stainless steel case with steel rotating bezel that has a black insert. Black dial with what would have been luminous hour markers. Date window to 3. Dial has aged naturally and beautifully.

Domed crystal that appears to be original. The dial itself is stamped 'Marc Nicolet' (a subsidiary of the legendary Armand Nicolet Watch brand that we see today).

Excellent working order and condition some minor marks and scratches but overall the condition for this watch from the 60's is excellent. Sold as watch only its fitted on a generic black leather strap and stele buckle but also comes with our 212 month guarantee.
