

Fancy Intense Yellow Diamond ring in 18ct White Gold date circa 1980, SHAPIRO & Co since 1979 £12,750.00

Fancy intense yellow diamonds are a type of yellow diamond that are highly sought after and prized by collectors. They are formed deep within the Earth and are made of carbon atoms that have been mixed with nitrogen. The amount of nitrogen in the diamond determines the intensity of its yellow color.
