

## **A Long Niello Chain**

**£775.00**

measuring 150cm

Niello (from Latin: Nigellus = “blackened”) is a metallic alloy with sulfur which is used as a surface decoration technique which, much like enamel, is fused to a metal base. The luster of niello, however, is metallic instead of vitreous and it is much tougher than enamel. Niello comes in just one color – black of various tones – which contrasts highly with silver, the most popular base for niello work.
